

NSA/CSS EVALUATED PRODUCTS LIST for OPTICAL MEDIA DESTRUCTION DEVICES

The Evaluated Products List (EPL) contains high security destruction devices evaluated by the National Security Agency/Central Security Service (NSA/CSS) that meet the performance requirements of the NSA/CSS Optical Media Destruction Device Specification. The table on page two identifies High Security Crosscut Combination Optical and Paper Shredders; additional tables are Optical Media Destruction Devices only. Inclusion of a product in the EPL is not an endorsement by NSA/CSS or the U.S. Government.

Alphabetically the EPL provides the device name and sponsor contact information for each device evaluated for sanitization of all classification levels. The one-hour duration performance is calculated by sanitizing 200 optical disks of the appropriate media (CD and/or DVD). The EPL is organized by the destruction techniques employed by the device (combination optical and paper cutting, optical cutting, optical milling, optical grinding, optical knurling, and optical disintegration).

All approved models that are discontinued and/or no longer manufactured remain on the EPL. Updates to the EPL will be on an as-needed basis. Users are encouraged to contact manufacturer representatives for assistance in selecting unit(s) best suited to their requirements. To determine if a specific model not listed meets the security performance requirements users can contact the Center for Storage Device Sanitization Research (CSDSR) at 301-688-1053, e-mail CSDSR@nsa.gov, or contact their respective Client Advocate Service.

The NSA/CSS PM 9-12 Storage Device Declassification Manual provides sanitization guidance for all classified storage devices. This includes optical media; to achieve this task of reducing Compact Disks (CD) and Digital Versatile Disks (DVD) the media area must be of twenty-five millimeters square or less with no long edge greater than seven millimeters in length.

The procedures for administration and distribution of the EPL are subject to change without notice. Inquiries from U.S. Government users should contact designated customer support channels through the NSA/CSS Information Assurance Directorate (IAD) Client Advocate Services. For IAD Client Advocate support to Civil and DoD Agencies, please call 1-410-854-4790 and for Military Services, Intelligence, and Combatant Commands please call 1-410-854-4200. If you prefer to send an e-mail, please contact us at NIASC@nsa.gov. For all other inquiries, please contact the NSA/CSS Public Affairs Office via phone at 301-688-6524 or send an e-mail to nsapao@nsa.gov.

1. Device was evaluated prior to the release of NSA/CSS Specification 04-02.
Device was not evaluated for durability. Adhesive labels may prevent destruction of the data and may significantly reduce device functionality and/or durability.
2. Remove or obliterate all classified markings prior to destruct.
